DLPC	Annex II to these OATS Rules: Ancillary Services Purchase Agreement	Clarification: 1. For Distribution Utilities with embedded generating plants and are capable of providing non-firm ancillary service (startup/backup power), will they be required to sign a contract to supply non-firm service 2. How will they be dispatched? 3. How will the energy/demand delivered/exported to the grid be measured? 4. How will they be compensated?	We are intending to pull-out the draft ancillary services agreement because we are working on a new one.	Replace the A/S Agreement
