<sup>1</sup> ERC Resolution No. 38, Series of 2006

**SAMELCO II's Power Situation**

7. SAMELCO II currently sources bulk of its electricity requirements from, the Power Sector Assets and Liabilities Management Corporation (PSALM), GNPower Mariveles Coal Plant (GMCP) and the Wholesale Electricity Spot Market (WESM). However, on December 25, 2014, its bilateral contract with PSALM expired;
8. To ensure continuous supply and security of electricity within its franchise area, SAMELCO II signed with FDCUI on December 22, 2014, a PSA for a contracted demand of 1 MW for one (1) year from December 26, 2014 to December 25, 2015. The power requirements for SAMELCO II shall be sourced from the Unified Leyte Geothermal Power Plant (ULGPP) Output administered by FDCUI;
9. SAMELCO II has forecasted and simulated the effect of the inclusion of the power supplied by FDCUI from the Output of the ULGPP, taking into consideration the reduced supply from the PSALM, to wit:

With FDCUI – ULGPP	PhP5.6360/kWh
Without FDCUI – ULGPP	PhP5.5481/kWh
<b>Rate Impact</b>	<b>PhP0.0879/kWh</b>

**The Selection of an Independent Power Producer Administrator (IPPA) for the Strips of the ULGPP**

10. On November 7, 2013, PSALM conducted the opening of bids for the selection and appointment of IPPAs for the Strips of Energy of the ULGPP located in Tongonan, Leyte;
11. FDCUI was selected as the winning bidder for the 40 MW Strips of Energy of the ULGPP. The Notice of Award was issued by PSALM on January 29, 2014;

The Region VIII electric cooperatives (R8 ECs) have undertaken a competitive selection process (CSP) in

September 2014 inviting power suppliers to participate in the Joint Competitive Power Supply Procurement (JCPSP) process for the short-term supply of power of the eleven Region 8 member-ECs for the Contract Years 2015 to 2018. Qualified bidders which signified interest to participate in the bidding process were provided with the Instructions to Bidders, Checklist of Eligibility and Bid Requirements, which include the legal, technical and financial requirements and Information Memorandum on the R8 JCPSP and member ECs;

As part of the bidding procedures, the eligibility and bid requirements submitted by each bidder were assessed while the technical and financial proposal (Bid Form) were separately and independently evaluated by calculating and comparing the effective price (PhP/kWh) of the power supply offered from the perspective of member-consumers of the ECs (i.e., net passed-through generation rates);

The Bid with the lowest calculated effective price in a contract year was considered the Lowest Calculated Bid (LCB) and was subjected to post-qualification;

For the bidder/s that has/have passed the post-qualification, its/their Bid/s was/were declared as the Lowest Calculated Responsive Bid(s). The ECs then awarded the PSAs to the Bidder/s whose Bid/s has/have been determined to be the Lowest Calculated Responsive Bid(s);

12. For the JCPSP process for the short-term supply of power of the Region 8 member ECs for the Contract Years 2015 to 2018, below is the Transaction Schedule indicating the activities conducted and the corresponding timetable:

<b>Activities</b>	<b>Date</b>

**The PSA**

13. After extensive negotiations with FDCUI, SAMELCO II signed on December 22, 2014, a PSA from the Strips of Energy of ULGPP for a contracted demand of 1 MW for one (1) year;

**Executive Summary**

14. The PSA governs the relationship between the Supplier and the Customer for the sale of electric power. The electric power supply will be drawn from the Output of ULGPP.
