8. In view of the increasing demand for power in its Franchise Area, BATELEC I conducted a Competitive Selection Process (CSP), the details of which are as follows:
 - 8.1 On 13 and 14 April 2016, BATELEC I published the Invitation to Bid for its Power Supply Requirements for its Franchise Area of 20MW Base Load (Demand Contract) for March 26, 2018 to March 25, 2028 and Load Following (Energy Supply Contract) for December 26, 2016 to December 25, 2028 on Philippine Daily Inquirer. Further, BATELEC I sent individual invitations to potential suppliers through electronic mail.
 - 8.2 GNPowder Ltd. Co. (“GNPowder”), along with other prospective suppliers, expressed its intent to join the CSP and was provided with a copy of the Instructions to Bidders. Thereafter, bidding conferences were held to clarify and discuss the selection process, requirements, rules, and evaluation method.
 - 8.3 On 10 May 2016, BATELEC I issued a Supplemental Bid Bulletin increasing the power supply requirements from 20MW to 30MW Base Load (Demand Contract) for March 26, 2018 to March 25, 2028 and Load Following (Energy Supply Contract) for December 26, 2016 to December 25, 2028.
 - 8.4 The applications for accreditation of BAC-MAN Geothermal, Inc., GNPowder, SEM-CALACA Power Corp.,

1590 Energy Corp. (1590 Energy), AES Philippines, Trans-asia Power Generation Corp., South Luzon Thermal Energy Corp. (SLTEC), and San Miguel Energy Corporation were approved per BAC Resolution No. 29-16 dated 27 April 2016.

- 8.5 Only GNPowder, SLTEC, and 1590 Energy submitted bids for BATELEC I's Load Following power supply requirements.
- 8.6 Upon submission and completion of the pre-qualification requirements, GNPowder, SLTEC, and 1590 Energy were declared as qualified bidders for BATELEC I's Load Following (Energy Supply Contract) for December 26, 2016 to December 25, 2028.
- 8.7 On 17 May 2016, the bids of the qualified bidders were opened. All the three (3) bidders complied with the eligibility requirements. Likewise, the qualified bidders complied with the financial and technical requirements of the bidding documents.
- 8.8 Each qualified bidder made a presentation of its offer to BATELEC I's Technical Working Group (TWG), Bids and Awards Committee (BAC), and Board of Directors. GNPowder confirmed during its presentation that the source of supply to BATELEC I shall be from (i) GMCP's 2x316 (net) MW clean coal-fired power plant in Mariveles, Bataan for Contract Years 2017 to 2019 and (ii) GNPD's supercritical coal-fired power plant in Mariveles, Bataan, which is currently under construction, for Contract Years 2020 to 2028.
- 8.9 After such presentation and post-qualification evaluation conducted, the TWG and BAC of BATELEC I confirmed that GNPowder submitted the Lowest Calculated and Responsive Bid/Quotation for Load Following (Energy Supply Contract) for December 26, 2016 to December 25, 2028 based on GNPowder's bid price offer as the projected levelized price considering the parameters of the offer and BATELEC I's evaluation methodology.
- 8.10 Accordingly, the TWG and the BAC recommended the awarding of the contract to GNPowder for the Power Supply Requirements of BATELEC I franchise area for Load Following (Energy Supply Contract) for December 26, 2016 to December 25, 2028 pursuant to BAC Resolution No. 40-16.
- 8.11 The BAC recommendation to award the contract to GNPowder was approved by the Board of Directors of BATELEC I pursuant to Board Resolution No. 90-16 issued on 13 June 2016.

8.12 Also, the Board of Directors of BATELEC I issued Board Resolution No. 121-16 authorizing the approval and signing of PPSAs with both GNPD and GMCP including its supplement agreements and amendments and other related documents.

PPSA to assure the adequate, reliable, and continuous supply of power to BATELEC I's Franchise Area after the expiration of GMCP's power purchase and sale agreement.

II. ABSTRACT OF THE PPSA AND OTHER RELATED INFORMATION

10. The following are the salient features of the PPSA¹:

- a. **TERM.** The PPSA shall be effective on the date of its execution and shall terminate after one hundred eight (108) months from the date to be specified in the Commencement Date Notice defined as the written notice that indicates the commencement of the first delivery of the Product after GNPD begins commercial operations in the market, which shall not be later than the first day of the Billing Period immediately after the lapse of thirty six (36) months from the date of ERC's final approval of the subject PPSA.
- b. **SOURCE OF SUPPLY.** GNPD shall make available, sell, and deliver or cause to be delivered to BATELEC I the Product at the Delivery Point, whether sourced from GNPD's facility or from other electricity generators, including the Wholesale Electricity Spot Market (WESM).
GNPD's facility shall be constructed and operated in Sitio Dinginin, Brgy. Alasasin, Mariveles, Bataan and its target availability in the WESM for early commercial operations is on December 26, 2018 (Contract Year 2019).
- c. **CONTRACTED CAPACITY.** BATELEC I is contractually entitled to receive from GNPD, at any hour, subject to GNPD's Available Capacity for such hour, the Contracted Capacity, as follows:

Year	Contracted Capacity (MW)
1	30,000
2	33,000
3	33,000
4	34,000
5	37,000
6	40,000
7	45,000
8	48,000
9	50,000

¹ Capitalized terms used but not defined herein have the meaning as defined in the PPSA.

BATELEC I shall utilize and pay for the capacity delivered by GNPD at 65% to 100% Capacity Utilization Factor (CUF).

c.1. Option to Increase Contracted Capacity. Section 3.7 of the PPSA provides that upon written notice to GNPD, BATELEC I may, upon approval by GNPD, increase its Contracted Capacity which increase shall be subjected to the same terms and conditions contained in the PPSA. In considering whether or not to approve the request for increase in Contracted Capacity, GNPD may take into consideration the capacity available for such increase from its facility in its sole opinion, and/or the willingness of any other buyer to assign its Contracted Capacity. Such increase in Contracted Capacity shall be effective on the date GNPD gives its written approval.

d. CONTRACT PRICE. The Contract Price shall be composed of the Capacity Price and the Energy Price. The Capacity Price shall be computed as the product of the Capacity Fee for a Billing Period multiplied by the quantity of Product delivered at the Delivery Point. The Energy Price shall be computed as the product of the Energy Fee for a Billing Period multiplied by the quantity of Product delivered at the Delivery Point.

d.1 The *Capacity Fee* is the component of the Contract Price allocated to pay for the cost, as well as, the operations and maintenance of the power plant and is designated as the Capacity Fee in *Schedule 1*, as such may be adjusted from time to time based on the Capacity Factor.

The corresponding Capacity Fee for a given Capacity Factor is set forth in the table below:

Capacity Utilization Factor (%)	Capacity Fee (USD per kWh)
100%	0.0496
99%	0.0500

The Capacity Utilization Factor (CUF) shall be computed as follows:

$$\text{Capacity Factor (CUF)} = \frac{Q}{CC \times (H_T - EH_{T0})}$$

Where:

- CUF** = is the Capacity Utilization Factor between 65% and 100%, provided that if the actual CUF is below 65% (the “Minimum Capacity Factor”), the Capacity Price shall be calculated based on the Capacity Fee and quantity associated with the Minimum Capacity Factor.
- Q** = Quantity of kWh
- CC** = Contracted Capacity, in kW, as set forth in Schedule 1 of the subject PPSA
- H_T** = Total number of hours in such Billing Period
- EH_{T0}** = Sum of the duration, in Equivalent Hours, of Scheduled Outages and Unscheduled Outages in such Billing Period

d.2. The *Energy Fee* is the component of the Contract Price allocated to pay for the coal, including Government Charges, designated as the Energy Fee in *Schedule 1* of the PPSA as adjusted from time to time due to changes in the delivered price of the coal. The Energy Fee shall be computed in accordance with the following formula:

$$\text{Energy Fee} = \text{IEF} \times \frac{\text{CIF}_n}{\text{CIF}_o}$$

Where:

IEF = Initial Energy Fee equal to \$0.0328/kWh
CIF_n = CIF Cost of Fuel for Billing Period **n**
CIF_o = Base CIF Cost of Fuel equal to \$10.2514/ million kcal

- e. **PROMPT PAYMENT DISCOUNT (PPD).** Section 5.3(c) of the PPSA provides that if BATELEC I pays the invoice amount in full within ten (10) days of receipt from GNPD, BATELEC I shall receive a discount equal to \$0.0012/kWh multiplied by the actual quantity of the Product actually delivered set forth in such invoice for the Billing Period for which the credit was earned.
- f. **CAPACITY UTILIZATION DISCOUNT.** Section 5.3 (d) of the PPSA provides that if BATELEC I pays the invoice amount in full in accordance with GNPD's invoice instructions on or before the twenty-fifth (25th) day of the succeeding calendar month from the relevant Billing Period and BATELEC I's CUF is greater than or equal to 65%, BATELEC I shall receive a credit on the next subsequent bill equal to 2.8% of the Energy Fee multiplied by the actual quantity of the Product actually delivered set forth in such invoice for the Billing Period for which the credit was earned.
- g. **SCHEDULED OUTAGES AND UNSCHEDULED OUTAGES.** Pursuant to Section 3.2 of the PPSA, GNPD is allowed Scheduled Outage not to exceed five hundred forty (540) Equivalent Hours for each Contract Year, during which times reduced or no deliveries will be available to BATELEC I. Likewise, GNPD is allowed Unscheduled Outage of five hundred forty (540) Equivalent Hours for each Contract Year during which times reduced or no deliveries will be available to the Buyer.

III. ADVANTAGES OF GNPD'S SUPPLY OF POWER AND IMPACT ON BATELEC I'S OVERALL RATES

- 11. The additional supply from GNPD will help alleviate and sustain the future power supply needs of the Luzon Grid including the Franchise Area of BATELEC I to prevent any likelihood of brownouts and power shortages.
- 12. Among alternative suppliers capable of providing additional energy to BATELEC I, GNPD's rate proved to be more reasonable and competitive. It is worthy to note that the Capacity Utilization Factor Pricing under the PPSA provides flexibility to BATELEC I in its utilization of the Contracted Capacity.

13. BATELEC I simulated a generation rate impact which ultimately resulted in a **reduction of PhP 0.1578 per kWh** with the execution of the PPSA with GNPD to wit:

VI. MOTION FOR THE ISSUANCE OF PROVISIONAL AUTHORITY

24. All the foregoing allegations are re-pleaded by reference in support of this *Prayer* for provisional authority.
25. The basis by which Applicants BATELEC I and GNPD pray for the issuance of a Provisional Authority or interim relief prior to final decision is *Rule 14 of the ERC Rules of Practice and Procedure*:

“Section 3. Action on the Motion. – Motions for provisional authority or interim relief may be acted upon with or without hearing. The Commission shall act on the motion on the basis of the allegations of the application or petition and supporting documents and other evidences that applicant or petitioner has submitted and the comments or opposition filed by any interested person, if there be any.” [Emphasis Supplied]

26. Based on the Department of Energy’s (DOE) 2016-2040 Luzon and Visayas Grids Supply-Demand Outlook, Luzon’s peak demand in 2016 is 9,726MW with an Annual Average Growth Rate (AAGR) from 2000 to 2016 of 3.8% while Visayas’ Peak Demand is 1,893MW with AAGR from 2000 to 2016 of 6.1%. Therefore, Luzon’s peak demand is expected to increase to 11,451MW in 2020, and to 18,432MW by the year 2030 and for Visayas, 2,465MW in 2020 and 4,765MW in 2030.
27. This electricity demand growth has led to DOE’s call for planning and investments in the power sector. It is therefore essential that there be continuous addition of power supply to address such increasing demand and lower the cost of power at the WESM, which ultimately shall benefit the end-user. GNPD and BATELEC I’s PPSA aim to address this increasing electricity demand growth.
28. In the same vein, contributing to the Luzon’s Grid’s demand growth is BATELEC I’s load demand increases at a rate of 5.4% per year. By Contract Year 2020, it is projected that BATELEC I’s existing power suppliers will not be able to meet the power needs of its member-consumers, which is expected to increase to 78.46MW.

29. Thus, the PPSA with GNPDP, is crucial for BATELEC I to guarantee that its forward power needs are satisfied, without compromising the reasonableness of the generation rate to be passed on to its member-consumers.
30. While actual delivery of power under the terms and conditions of the PPSA is expected to commence only in the Contract Year 2020, Applicants shall nonetheless begin its compliance with all financial and regulatory requirements and processes leading up to the timely operations of GNPDP's facility.
31. It is worthy to note that part of the funds needed to construct GNPDP's facility will be sourced from loans coming from banks/financial institutions. The Honorable Commission's provisional approval of the instant *Application* is a vital requirement for the continuous release of the loan proceeds. In fact, as shown in Annex "S" attached hereto, in consideration for making the aforesaid construction and term loans/ facilities, among the approvals required by the lenders of GNPDP is the Honorable Commission's provisional approval of the PPSAs. Hence, the continuous loan drawdown ensures stable source of funds and consequently, a timely construction of the generation facility and implementation of the PPSA, as amended, as contemplated by the Applicants.
32. With continuous financing, the timely implementation of the GNPDP project shall be assured, to the full benefit of BATELEC I. Otherwise, any delay in the implementation of the project shall expose BATELEC I to supply risk and unstable market prices in the future.
33. To emphasize the necessity of the provisional approval of this *Application*, a copy of the Judicial Affidavit of Mr. Arnel Bilaoen in support of the Motion for Provisional Authority is attached hereto as Annex "KK".
34. In view thereof and in recognition of the fact that a substantial amount of time is customarily needed to evaluate the documents submitted to support the approval of this *Application*, Applicants BATELEC I and GNPDP respectfully seek the kind consideration of the Honorable Commission to approve the instant *Application* immediately, albeit, provisionally.
